**KIOSK SOLUTIONS**

# POLYTOUCH® PASSPORT 27

## **SELF ORDERING & TICKETING KIOSK**

With two displays, the 27" PASSPORT is ideally equipped for any space that gets particularly busy during peak hours:

In quick service and fast casual restaurants, the 27" PASSPORT speeds up ordering and payment processes many times over. This also applies to ticketing in the leisure industry.

For those who can do without dual power, the system is also available as a single standalone and wallmount variant.

The 27" PASSPORT's footprint is minimal, so it's never been easier to integrate a self-service terminal into existing store designs.

# POLYTOUCH® PASSPORT 32

## **SELF ORDERING & TICKETING KIOSK**

The 32" PASSPORT makes ordering in the system gastronomy and the ticket purchase in the entertainment area faster and more convenient

With its large and responsive display, we have optimized the 32" PASSPORT for order processing in quick service and fast casual restaurants and as a ticketing solution (cinemas, concerts, shows, exhibitions).

Different form factors (single and dual display) and mounting options (wallmount, stand), the small footprint and the possibility to integrate numerous peripherals guarantee maximum flexibility in the purpose and placement on the surface.

In its dual display variant, the 32" PASSPORT serves two customers at the same time, reducing waiting times during busy periods.

# POLYTOUCH® NEO 21.5"

## **WAYFINDER KIOSK & SELF-SERVICE POINT**

The newest member of our interactive kiosk family. Building upon the success of its predecessor, Classic, Neo takes user experience to new heights with its modern design and cutting-edge hardware. Featuring a compact 21.5-inch full HD touch display, Neo is the epitome of convenience and style.

Neo showcases a sleek and contemporary design that seamlessly blends into any environment. Its slim profile and clean lines exude sophistication, adding a touch of elegance to museums, hotels, retail spaces, and more.

# POLYTOUCH® OUTDOOR

## EVERYWHERE AND FOR ALL SEASONS

- The OUTDOOR kiosk terminal simplifies cashless ticket sales for public transport operators and passengers. 24 hours a day, 7 days a week!
- On the 32"-touch screen of the OUTDOOR, purchasing passenger tickets is easy for everyone.
- On the OUTDOOR kiosk terminal your food and beverages appear so crisp and sharp that just looking at the images and videos will turn a small appetite into a big one.
- High readability of screen content even under difficult lighting conditions due to Optical Bonding

# POLYTOUCH® SWIFT 24

## **SIMPLY SELF-ORDERING**

We are specialists in digital self-service in the food service industry. We are expanding our position in the industry with the SWIFT.

Searching for a Cost-Efficient Terminal for Self-Ordering with Complete Hardware Integration? Than the SWIFT is just right for you. Our new kiosk comes with everything you need to make ordering food and beverages as smooth as possible for your guests.

# POLYTOUCH® FLEX 21.5"

## **FAST, INTUITIVE, APPEALING SELF-CHECKOUT KIOSK**

With its ultra-compact chassis, the FLEX Self Checkout Kiosk finds its place in every shop concept, whether in large-scale food retailing or in micro-markets. The different mounting options also contribute to this. The FLEX kiosk solution cuts a fine figure as a floor-standing, wall-mounted or countertop version.

The ergonomic arrangement of the modules reduces the interaction area of your customers during self-check-out to an absolute minimum. The high-resolution, frameless multi-touch screen conveys a familiar technology atmosphere by being oriented towards the look and feel of tablets. So old and young know what to do.

# POLYTOUCH® CURVE INFOTERMINAL

## A SELF SERVICE KIOSK FOR EVERY DAY

Through displaying interactive content, the Curve Info Terminal attracts the attention of customers or visitors. Unlike analog advertising or information tools, the Curve Info Terminal is easy to update, allowing for a quick response to changing situations. Equipped with the right peripherals, it can serve you and your customers in the best possible way: showcasing updates about seasonal offers, product specifications or receipt inspirations – you decide how the Info Terminal will offer help, guidance or inspiration.

The kiosk is powered by our in-house solution – the Akhet PC-Box. The Box sits behind the display and is incredibly compact in size, at the same time offering various ports that ensure the connectivity of the box. The unique design with two curved pedestals allows for a smart integration of all peripherals without changing its overall shape.

## OUR COMPANY HISTORY

At MetroClick, we help you focus on telling your unique story to your customers. We are an organization that listens, evolves and innovates unique points of interaction with your clients to create engagement and boost your brand's impact.

We have developed millions of lines of code while designing new, unique solutions to accommodate our clients' needs and interest across numerous industries. From stadiums to financial services institutions, high fashion to hospitality, MetroClick's team is versatile to meet any engagement, industry or clients' needs to help present your message and desired customer experience one touch at a time.

## WE CREATE INTERACTIVE EXPERIENCES & PRODUCTS

MetroClick has merged hardware manufacturing capabilities and an in-house software development team to create the highest levels of functionality, customization and versatility. We pride ourselves on being a full-service platform bringing both your hardware and software vision to life.

## ENGAGE & CONNECT WITH CUSTOMERS IN YOUR INDUSTRY

Our mission is to develop incredible software and hardware solutions that create unforgettable interactive experiences to increase brand awareness.
